The threat of being sued is now a big part of your doctor's practice.

Guess why your medical bills are skyrocketing.

The medical malpractice situation is a mess.

Insurance companies are paying out record settlements in a record number of malpractice cases. The St. Paul's case load, alone, tripled between 1969 and 1975.

Insurance companies, in turn, have had to raise doctors' and hospitals' malpractice insurance rates to record highs.

This cost is added to patients' medical bills which is one of the reasons your medical care costs are rising.

What's more, you may be paying for treatment you don't need and your doctor doesn't want to give. Reason? Doctors and hospitals have been forced into practicing "defensive medicine" to build malpractice defenses in advance. This stacks still more on top of your already high cost of medical care.

On top of that, some doctors and hospitals report cutbacks in high risk treatments for fear of being sued. That means the quality of your medical care could be affected.

About half of all malpractice claims are eventually found to be without merit. Nevertheless, it is costly for the insurance companies to investigate and defend these claims.

So it's not only a vicious circle, it's a vicious escalating spiral that's dipping deep into your pocket every time you need medical care. Or each time you or your employer pay a medical insurance premium.

We at The St. Paul thought you ought to know about this mess, since you help pay the bill. And also because you might want to take some action.

To learn what you can do, send for our "Enough is Enough" consumer booklet. It's full of information on the causes and the pro's and con's of some possible cures for high insurance rates. You'll find out how to register your views where they'll count. Along with some tips on how you can hold down your own insurance costs.

Then get involved. Support the action you want taken.

Write a letter to your legislators. Be heard.

Or you can just do nothing a figure the problem will go away. C course if it doesn't, better keep y checkbook handy.

An uncommon place

From time to time individuals may experience extreme problems in living. When this happens it may be necessary to seek help from experienced members of the medical and helping professions. Mandala Center is an uncommon place dedicated to bringing to individuals an awareness of the source of their distress and help them find resolutions to their problems.

A fully-accredited 75-bed private psychiatric hospital and clinic, Mandala moved to its new quarters on a 16-acre suburban site in November, 1976. Founded in April, 1972, the Center serves individuals from the mildly distressed to the acutely disturbed.

Children, young people and adults may enter the treatment programs. Hospital and clinic programs are available for all categories of emotional and mental dysfunctioning including alcohol and drug abuse. Interdisciplinary treatment teams plan and implement the programs which are individualized for each person. The services consist of individual, child, couples, group and family therapies, pastoral counseling, sexual and living skills education, vocational guidance and rehabilitation, psychological testing, chemotherapy, psychoelectrotherapy and other somatic therapy services.

Under medical supervision, the treatment teams consist of psychiatrists, psychologists, pastoral counselors, social workers, physicians' associates, psychiatric nurses, mental health workers, occupational and activities therapists.

General medical care and special medical problems are provided for by our consulting staff.

Committee and Commission Appointments 1977-1978

NOTE: The Committees listed herein have been authorized by President E. Harvey Estes, Jr., M.D. and/or as required under the *Constitution and Bylaws*.

Particular note should be taken of the authorization of the HOUSE OF DELEGATES of a Commission form of organization activity and that all Committees, excepting COMMITTEE ON NOMINATIONS and MEDIATION COMMITTEE are segregated under the respective Commission in which the function of the Committee logically rests. This will tend to eliminate overlapping and duplication in activity programs and result in coordination of the work of the Society in a manner to lessen the work of the delegates in the Annual Meeting of the HOUSE OF DELEGATES.

(*Superior figures (e.g. 21)* indicate the component County Society from which the member emanates, as in the Membership list of the ROSTER.)

Computer Credit, Incorporated is a specially designed computer collection letter service for the medical profession, currently serving twelve North Carolina hospitals and more than 750 physicians and dentists in the Carolinas and Virginia. CCI offers an effective, easy-to-use service that can markedly improve your delinquent account collections. This service requires no more than a minute of your time per account. There are no expensive fees or retainers with CCI, just one small fee for each account. CCI is not a traditional collection agency; we do not handle your money. Calcium:

a stitch in time?

Recent evidence suggests that long-term calcium inadequacy may contribute to the development of osteoporosis in later life.

Osteoporosis can lead to bone demineralization and afflicts millions of Americans today, mostly women. Disturbances in the protein, mineral and/or hormonal aspects of bone metabolism have been implicated as causative factors. When detectable by x-ray, osteoporosis represents a loss of from 25 to 50 percent of bone calcium.

Current studies suggest that dietary inadequacies of calcium of many years duration may contribute to the development of osteoporosis in later life. Osteoporosis has been found to occur much more frequently in elderly patients who have become accustomed to a low calcium intake than in those with a high level of calcium consumption. Metabolic, histologic and radioactive tracer turnover studies have demonstrated that increased bone resorption due to a deficiency of calcium in the metabolic pool is a prominent feature of human osteoporosis.

During adolescence calcium requirements are high and intake often below recommended allowances. In adolescence and adulthood, as in infancy and childhood, the building and maintenance of well-mineralized bone is facilitated by a calcium intake commensurate with needs. Milk is the prime source of calcium in the daily diet supplying 1.22 grams per quart. Milk sugar (lactose) may have a stimulating effect on calcium absorption.

A well-balanced varied diet containing at least a quart of milk per day — or its equivalent in other dairy products — fulfills the immediate calcium demands of the teen-ager. A sustained adequate calcium intake throughout adulthood may also contribute to the prevention of crippling osteoporosis in the years to come.

Practice Productivity Inc.

To be of genuine service to you is Practice Productivity's (PPI) reason for existence. PPI provides fine practice management assistance to many of your colleagues, helping each of them and their staff improve the quality of care given to patients.

Practice Productivity is a national management consulting firm for physicians. The principals are experienced consultants working in two significant areas:

1. We present workshops in sound business concepts to practicing physicians, residents, office managers, and medical assistants. These workshops are usually endorsed by various specialty societies and state medical associations.
2. We provide in-depth consulting to physicians in private practice. Since we do not involve ourselves in the practice on a continuing basis, our objective is to visit the practice, expose practice problems, give proposed solutions, and set direction for the physicians to implement the needed changes. Our consulting experience covers nearly all medical specialties. References in your specialty are available upon request.

PPI's consistent message is "Sound business knowledge and procedures are essential to provide quality patient care." *For further information on workshops or a consultative visit to your practice, contact:*

Think Inc.

To incorporate or not to incorporate? Maybe that's not the real question. After all, you've probably heard it's a nice opportunity. That is, you can take advantage of the liberal tax treatment available to corporations through qualified pension or profit sharing plans.

So perhaps the more significant question is where to go for assistance. Perhaps you should go right to the top.

New England Life writes more individual pension plans than the two next companies combined. In fact, we were helping physicians, attorneys, and accountants, to name three, solve complex financial problems long before the professional corporation came along. And our associates' experience in this field, together with their reputation among professionals, is a matter of record.

Furthermore, the plans they can offer you and your professional advisers are pre-approved by the IRS and afford the kind of flexibility necessary to develop a program to meet your needs exactly.

For instance, you have freedom in determining plans contributions or benefit levels. You can wait until retirement to pick your form of payment. And working with one of our associates, you can choose from a variety of vehicles to supplement your plan's objectives.

To incorporate or not to incorporate... think about it. And then if you do, think of us.
